

VENDOR APPLICATION

BACKGROUND

The Alarm Association of Greater St Louis has teamed up with ASIS St Louis to create a new Midwest Security EXPO, the Gateway Security Expo (GSX). Both organizations have always put on a good show... but why always 2... just months apart? The GSX will become the go-to expo for those who do not have the time or budget to travel across the country for a national show. The GSX will bring the local organization charm, but on a larger scale. The show will be "upgraded" with a larger venue, better food, more vendors, 100s more attendees, more classes, and more prizes. Vendors will be given the opportunity to network with security decision makers while promoting their own technologies and services. By combining the two organizations' efforts, it truly is a win-win for everyone! For more information, please [Click Here](#).
