Three Day Training Nov 29-Dec 1, 2018 St. Louis, MO

This three-day training class provides the knowledge necessary to perform entry-level responsibilities within the many facets of the electronic life safety and security industry. The course presents an overview of the theory, installation and maintenance of alarm systems, basic electricity, standards, perimeter detection, space detection, fire systems, control panels, communications, video surveillance, job planning and false alarm prevention.

This course is open to all, but designed for staff and business owners employed in the alarm industry. The course will review the operation, application, installation and maintenance of commonly used equipment and components and present industry standards and requirements.

This is a certification course, and the certification exam is given at the end of the 3-day training. CEU # NF-0001
